

Volunteer Positions:

- **Course Xing':** The position will ensure that the course is secure while the riders are warming-up and racing. There are several Course Crossings on and near the course. Safety is the key!
- **Packet Pick-up:** All athletes must pre-register for this event but, they will need to get their packets. 1500+ athletes will need to be processed as the event goes on.
- **Set-up:** Do you want to get dirty? This is your job. There is a lot of infrastructure to put in place for an event of this size. We need all hands on deck.
- **Tear Down:** All of that hard work that was put into building the venue will need to be reversed. We need to leave the venue just like we found it.
- **Parking:** We have 2000+ cars to park and we need to control where all of them go. We need assistance in the team parking and general parking areas.
- **Staging:** Do you want to be close to the Pro's? Here's your chance. Each race will stage 15 minutes before the start. The riders will need to line-up based on the order of their bib number. This needs to be done in an efficient and timely manner to keep the races on schedule.
- **Course Management:** The course will take on some damage throughout each day! The riders will ride off course and Mother Nature can do weird things in Kansas in December! We will need help with maintaining the integrity of the course.
- **Volunteer Processing:** Help the helpers! Assist the Volunteer Coordinator manage the 100+ volunteers that it takes to manage the event.
